

QUALITY POLICY

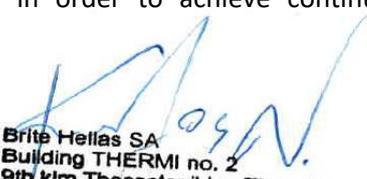

Brite Solar is a nanomaterials company utilizing innovative materials and deposition techniques to deliver a new class of glass materials for building construction. Brite's strategic goal and commitment is to understand current and future customer needs, meet their requirements and strive to exceed their expectations.

To accomplish this, Brite is committed to:

- Developing high quality and innovative products that meet or exceed our customers' requirements with the aim to enhance and exceed our customers' satisfaction.
- Continuously investing our efforts to deploy advanced nanomaterial engineering to create new types of glass products and have a positive impact on worldwide energy consumption to support a growing world population.
- Continuously improving our development processes, methods and expertise.
- Developing and maintaining high level communication with our customers, suppliers, partners and other interested parties.
- Creating and maintaining a working environment where people become fully involved in achieving our objectives and targets.
- Building a culture of continuous improvement within our organization whilst adding value to processes and all other areas of business, as well as complying with all applicable statutory and regulatory requirements

In order to achieve all above goals, Brite:

- Has developed, installed and implemented a Quality Management System (QMS) in accordance with the requirements of ELOT EN ISO 9001: 2015 and takes accountability for the effectiveness and the continuous improvement of the QMS.
- Promotes the use of a process approach and risk-based thinking.
- Sets quality objectives and targets that are compatible with the context and strategic direction of the Company and provides all the resources needed for the effective QMS implementation including training, support and encouragement.
- Communicates the importance of effective quality management implementation and encourages, engages and supports all personnel's contribution to the effectiveness and continuous improvement of the QMS.
- Routinely monitors, assesses, evaluates and reports performance in key activities and uses the data collected to make informed and effective decisions on how to improve its processes.
- Reviews on an annual basis the effectiveness of the QMS of Indicators and Objectives and the Quality Policy itself, in order to achieve continuous improvement in its performance.
